

My Blog New Edit Page D Enable Visual Builder - [DO NOT use the frontend visual builder for this project.] Howdy, admincaleb

A place to learn.
We provide books to thousands of kids.

Who can participate?

Anyone all around the world can participate. The easiest way to participate is to search your house for unused books, put them in a box, and send them to us to distribute them to kids and families or to be put for use in our libraries. Books are meant to be read. Make sure they are being read.

The lives you touch

Help kids to learn
Your helping kids to learn by providing books to our volunteers who read to groups of children. These children can hear our volunteers read books to them in a fun environment.

Help families
We distribute our books to families all over the globe so that families can do their part and read to their young ones. Parents reading to their children is so important.

Help single moms
We also focus on single moms that want to help their children get educated. We focus on mom's that need this help. You would be providing books to these single parents that need our help to teach them how to read to their child at a young age.

What happens after you donate?

After your donation is complete and you have sent off your books, they are organized in our book library. We have more volunteers organize your books by genre and level of reading. Books can be donated for adults and kids. After they are organized, we then select which books will be sent off to other places and which will stay in our library. Then your books are being used to educate kids and adults all over the globe.

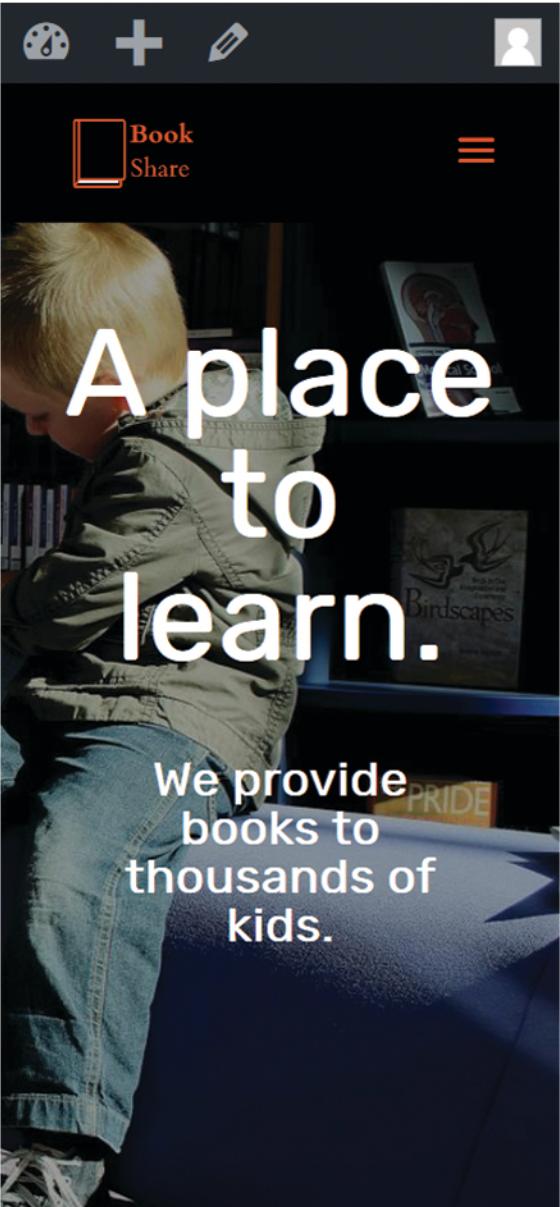

Put your books to good use!
